

THC Safety Celebrates Client's Award for PA Permit to Operate

THC Safety's client Terrapin was awarded one of the twelve grower/processor permits by the State of Pennsylvania for medical marijuana. We are very proud to have been on their team and to have supported their application effort.

THC Safety provided design, industrial hygiene, and safety services for Terrapin's PA license submission. The support included creating the "Cannabis Facility Safety Envelope TM" for the operation.

The safety envelope report provided guidance to the architect, engineer, city planner's office, & fire department concerning the planning and construction of the facility and providing the basic design for the extraction & post processing areas

Items Completed:

1. Project review
2. Hazard assessment
3. Interpretation of IFC, IBC regulations
4. Design layout for extraction and post processing areas
5. Recommended engineering & administrative controls
6. Emission control ventilation system specification
7. IH Assessment of Operations, Hazards, Controls, and Recommendations report
8. List of specific IH & Safety recommendations
9. Produce a proposed chemical inventory list with identified chemicals and quantities
10. HazMat management report with a location sketch & assistance with labeling areas
11. Design specifications and limited license for our patent pending Cannabis Extraction Room
12. Assistance with the completion of the application sections covering; employees' qualifications and duties, processing, extraction, sanitation, safety, QA/QC, and disposal of MMJ waste.

We are very proud to have supported Terrapin's successful effort to obtain a Pennsylvania MMJ permit.
